Michael Geist: DVM, DACVIM (small animal internal medicine)

BIO:

Dr. Michael Geist serves as the Chief Medical Officer for Green Dog Veterinary Center and is a board-certified internal medicine specialist and practitioner. His degrees include Doctor of Veterinary Medicine (DVM) and Diplomate of the American College of Internal Medicine (DACVIM)

He has worked in private practice since 2006, working at different multi-disciplinary emergency and specialty hospitals in New York City, San Diego, and Los Angeles. Dr. Geist has a love of medicine, science, and helping people with the healthcare needs of their pets.

EVENT DETAILS:

- **Dates:** July 11th - 12th
- **Location:** Green Dog Dental & Veterinary Center, 14661 Aetna St, Van Nuys, CA
- **Total CE Hours:** 8 Hour Hands-On Lab Work
- **Cost:** \$1629
- **Vet Social Dinner:** Yes
- **Spots available:** 20
- **Who can register:** DVMS ONLY

Credits

- **14 CE Hours RACE APPROVED**

What's Included

- Course materials and printed notes
 - Breakfast, lunch, snacks, and refreshments
 - Certificate of Completion
 - Special thank-you gifts for all attendees
 - Access to post-event resource links and scan protocols
-

Event Overview

Green Dog Veterinary Center is proud to present our next Continuing Education course, led by Dr. Michael Geist, a Diplomate of the American College of Small Animal Internal Medicine. This two-day, clinically focused, hands-on course is designed for practicing veterinarians seeking to advance their ultrasound imaging skills for abdominal diagnostics in general practice settings.

Our goal is to deliver a hands-on, practical learning experience focused on real-world applications, enhancing diagnostic accuracy and patient care. With over eight hours of laboratory sessions using live dogs and cats, this course will teach participants how to operate ultrasound machines, optimize image quality, and perform comprehensive abdominal ultrasound examinations. Attendees will gain a deep understanding of normal abdominal anatomy and learn the techniques needed to consistently obtain diagnostic images.

We are proud to partner with Samsung, who will be providing all ultrasound machines for the event and subsidizing the course. Samsung will also promote the event through their national channels, including their conference booth, website, and outreach platforms.

This course is ideal for veterinarians ready to integrate ultrasound more fully into their diagnostic toolset and improve real-time decision-making for their patients.

LEARNING OBJECTIVES:

By the end of this course, participants will:

- Understand the basic functionality of an ultrasound machine and how to adjust settings to achieve optimal diagnostic images.
- Develop a systematic approach to performing abdominal ultrasounds in general practice.
- Recognize normal sonographic anatomy of key organs, including the liver, pancreas, spleen, kidneys, adrenal glands, urinary bladder, and gastrointestinal tract.
- Understand the anatomical differences between dogs and cats and how they appear sonographically.
- Practice hands-on scanning to improve probe handling, image acquisition, and evaluation techniques.
- Identify common diagnostic pitfalls and learn strategies to avoid them.
- Gain confidence in interpreting common abdominal pathologies and abnormal anatomy frequently encountered in general practice.

Who Should Attend?

- General practice veterinarians
- Veterinary associates interested in improving their ultrasound skills

- Recent graduates looking to expand their diagnostic capabilities
-

COURSE SCHEDULE:

2026 - ULTRASOUND CE WEEKEND COURSE

*****This is the actual course schedule sent out to course attendees - Jenn will be sending this out EOD day today. Thursday July 9th.

INTERNAL SET UP:

LOGISTICS CHECKLIST:

LECTURE SETUP:

Electronics:

- | | |
|--|---|
| ☐ Backup laptop/computer | ☐ Clicker/remote and laser pointer |
| ☐ Microphone | ☐ HDMI/VGA Adapter |
| ☐ Display screen or projector | ☐ Speakers (if slides contain audio) |

For Students:

- ☐ Handouts or printed lecture notes in binders
- ☐ GDD-branded goody bags (notebooks, pens, water bottles, mints)

LAB SETUP:

For Dr. Legendre:

- ☐ Primary dental table
- ☐ Macro lens camera set to a TV for live demonstration (ideal)

Per Student:

- | | |
|---|--|
| ☐ Dental tables | ☐ Suture (4-0 and 3-0) |
| ☐ Complete set of dental instruments | ☐ Gauze |
| ☐ Loupes with light | ☐ Dental burs (Dr. Loic's preferred types?) |
| ☐ Cadaver heads | ☐ Distilled water for dental machines |
| ☐ Face masks | ☐ Sharps container per table |
| ☐ Disposable bouffant scrub caps | |
| ☐ Gloves | |

Supplies to Purchase:

- ☐ Additional dental burs (**Coltene?**)
 - ☐ Round bur, Diamond football bur, 701 taper crosscut, 701L taper crosscut surgical length
 - ☐ Disposable scrub caps
 - ☐ Cadaver heads (Order by March 1st if from Skulls Unlimited)
-

FOOD & REFRESHMENTS:

Saturday & Sunday Breaks:

- Water, coffee, MUDWTR, sodas, juices
- Fruits, protein bars, chips, bagels
- Disposable plates, forks, spoons, cups

Saturday Lunch & Dinner, Sunday Lunch:

- **Venue:**
-

EVENT STAFF & PERSONNEL:

Doctors:

- Dr. Geist

Other Team Members Attending:

- TBD

Other Team Members Working:

- TBD
-

TO CONFIRM WITH DR. LOIC LEGENDRE:

- Any special requests or preferences?
 - Preferred **dental burs** (Tapered cross cut, Round bur, Diamond football bur)?
-

PROMOTION & MARKETING:

- ☒ Create **flyer, email, and promo sheet** for event

- ☒ Send invitations to **local clinics** via email, visits, and texts
- ☐ Track responses in **Master Referral Sheet**
- ☐ Create an **event program** with:
 - ☐ Branded **GDD Cover Page**
 - ☐ **Event Itinerary**
 - ☐ **GDD CE Marketing Materials**

FILMING & PHOTOGRAPHY:

- ☐ HSO scheduled to be on both days
 - ☐ Need action shots or lecture and labs
 - ☐ Testimonials:
 - ☐ Need at least 3 testimonials from DVMs who took the course
-

FINAL CHECKLIST:

- ☐ **Venue Setup**
- ☐ **AV Equipment Ready**
- ☐ **Food & Refreshments Ordered**
- ☐ **Eventbrite/Ticketing Setup**
- ☐ **Marketing Launched**
- ☐ **RSVP for Social Dinner**
